<b>Place of subject in the curriculum:</b> second semester	
<b>Prerequisites:</b> General and Developmental Psychology 1	

**Course description:**

Students learn the factors that affect a healthy development and the main characteristics of its processes. They understand the characteristics of motor skills, cognitive, moral and social-emotional development connected to life stages, with special attention to the embryonic, neonatal, infant and childhood phases. We focus on the cognitive and moral and social development of the children aged 3-7. Our working frame s the given culture and the family the child is coming from. A significant topic is digital literacy, i.e. the effective use information and communication technologies. Our objective is to have access to information as well as to understand and use it in a critical, competent, precise and creative way.
