

The Atypical Development Methodology Centre working under the Department of Psychology and Physical Education won an Erasmus+ KA220-HED - Cooperation partnerships in higher education a two-years research grant in 2023:

Title of the project: Cognitive coaching for needs-based pedagogies in teacher training

Project Acronym: COGNI-TEaCH

Project Number: 2023-1-HU01-KA220-HED-000159529

Project partners:

- YVASKYLAN YLIOPISTO, Finland
- Fundatia Central Educational Spektrum, Romania
- UNIVERSITAT LINZ, Austria

About the research project

The COGNI-TEaCH project deals with digital curriculum development for higher education and targets the higher education priority of "stimulating innovative learning and teaching practices". In order to fulfil this priority, we provide teachers with data-based teaching. Innovative, unique content prevails in our project, i.e. the cognitive, emotional and social development of learning. We provide the methodological material in digitized form and transmit it online. The online, open-access curriculum provides future and practicing teachers with effective skills, tools and pedagogical methodologies to develop the cognitive, emotional and social competences of primary school children.
